Offer: 26716 – Taurus 60

Available Gasturbine and Boiler Power Plant

One (1) Solar Taurus 60, SoloNOx single shaft Gas Turbine Package
and

One (1) Waste heat recovery boiler with duct burner

Pos.1) Gas Turbine packages

Type	Taurus 60 SOLONox
Fuel	Natural gas and light oil
Output	6000 KVA / 10,5 KV
Voltage	6.3 kV, 50 Hz
Total operating hours on present engine	29000
Availability	12 weeks Ex-Europe
Year of manufacturing	1999
Year of commissioning	2000

Scope of Supply

- Single shaft, three stage, open cycle
- Enclosed (outdoor) design
- SoloNox combustion system
- for reduced emissions
- High temperature resistant compensator
- Combustion air is cleaned with a self-cleaning filtration system
- Lube oil cooling by water/oil type cooler
- Start System : electro/hydraulic
- Fuel System: natural gas fuel with manual shut-off valve, filter and primary shut-off valve
- Inlet (Barrier) and Exhaust system, Pneumatic start
- Single base-frame, sound proofed

Package: EURO 1.3 million

Pos 2) One (1) Waste heat recovery boiler with duct burner

Technical description:

Designed for production of steam

Steam pressure 20 bar

Steam temp. 215 °C

Steam mass flow 30 t/h

Additional Piping, exhaust, pumps, valves, controls, additional burner with 13 MW max power.

Boiler: EURO 550.000,00
